- Successfully launched the app within planned timeframes.

PROFESSIONAL EXPERIENCE

Full Stack Developer

E-commerce website

- I built the frontend pages with the design made for it, made sure the frontend pages look exactly as it was designed.
- Used HTML, CSS and JavaScript for the frontend, but the major work is in the backend where I'm using Django as a framework, to add items to the cart and get them ready for confirmation and payments.
- Making use of online resources to ensure more efficient results.

Frontend Developer

Restaurant website

- I made some research and used of some resources to make it really perfect looking. I pushed to Github and hosted this with Netlify
- Created a form to make reservations just by filling it correctly and also in the site contains the restaurant menu lists
- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience.

Web App Developer

Space-tech (Blog)

- Utilized React for frontend development, incorporating CSS for styling.
- Implemented a backend admin panel for blog post management, utilizing Rest framework for frontend-backend connectivity.
- Hosted the project on Vercel, ensuring accessibility, responsiveness, and optimal user experiences.
