CAREER OBJECTIVE

I am a full stack developer with over 3 years of experience in database administration, website developing and mobile app creation for both iOS and Android. Strong creative and analytical skills. Team player with an eye for details.
I work with a proven ability to adapt in both self-starting and collaborative environments while staying focused on achieving high-quality results under strict deadlines. Eager to obtain a challenging position at a prestigious company soon that will expand my learning and build upon my developer skills.

EDUCATION

University of Benin (UNIBEN)
Bachelor's Degree in Engineering

SKILLS

- HTML
- CSS
- JavaScript
- Python
- Django
- Git
- MySQL
- Postgres
- React
- React Native

CERTIFICATIONS

- A certificate from Mimo app.
- A Software Engineering certification from ALX Africa
- Then some few certificate from Sololearn

Mobile App Developer

Unimingle
- I collaborated closely with the designer to conceptualize, design, and implement new features.
- My responsibilities included creating and managing the backend of the app, well I also assisted with the developement of the frontend as it was a team work, which i had to implement my knowledge of React-native.
- Throughout the project, I demonstrated strong problem-solving skills and a keen eye for detail, resulting in the successful launch of the app within the planned timeframe.
- I made use of python and Django for the creation of the backend, thereby implementing all the necessary functionalities. I used MySQL as the database to save important and necessary details and informations.

PROFESSIONAL EXPERIENCE

Full Stack Developer

E-commerce website

- I built the frontend pages with the design made for it, made sure the frontend pages look exactly as it was designed.
- Used HTML, CSS and JavaScript for the frontend, but the major work is in the backend where I'm using Django as a framework, to add items to the cart and get them ready for confirmation and payments.
- Making use of online resources to ensure more efficient results.

Frontend Developer

Restaurant website
- I made some research and used of some resources to make it really perfect looking. I pushed to Github and hosted this with Netlify
- Created a form to make reservations just by filling it correctly and also in the site contains the restaurant menu lists
- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience.

Web App Developer

Space-tech (Blog)
- I made use of React as a frontend stack and CSS for the styling, and also did some research and made use of some resources to make it really perfectly looking. I pushed to Github and hosted this with Vercel
- Created a very accessible backend admin panel that can be used for adding blog post to the site and would be displayed very responsively. I used Rest framework as the API to link frontend with the backend.
- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience.
