Full-Stack Developer

CAREER OBJECTIVE

I am an intermediate level Full-Stack developer with two years of experience in database administration and website developing. Strong creative and analytical skills. Team player with an eye for detail.
I work with a proven ability to adapt in both self-starting and collaborative environments while staying focused on achieving high-quality results under strict deadlines. Eager to obtain a challenging position at a prestigious company soon that will expand my learning and build upon my developer skills.

EDUCATION

University of Benin (UNIBEN)
Bachelor's Degree in Engineering

PROFESSIONAL EXPERIENCE

Full Stack Developer
E-commerce website

- I built the frontend pages with the design made for it, made sure the frontend pages look exactly as it was designed.
- Used HTML, CSS and JavaScript for the frontend, but the major work is in the backend where I'm using Django as a framework, to add items to the cart and get them ready for confirmation and payments.
- Making use of online resources to ensure more efficient results.

Executive Assistant
Honey website

- I collaborated closely with designers to conceptualize, design, and implement new features.
- My responsibilities included conducting market research, gathering user feedback, and refining the app's user interface to enhance the overall user experience.
- Throughout the project, I demonstrated strong problem-solving skills and a keen eye for detail, resulting in the successful launch of the app within the planned timeframe.

Executive Secretary Intern
Restaurant Website

- I made some research and used of some resources to make it really perfect looking. I pushed to Github and hosted this with Netlify
- Created a form to make reservations just by filling it correctly and also in the site contains the restaurant menu lists
- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience.
